

# WHOLE HOUSE WATER CONDITIONING SYSTEMS MADE SIMPLE!

For the curious or engineering buffs, our water conditioning system reduces or completely removes chlorine, heavy metals and bacteria from water without adding chemicals. We cleanse the water of its unwanted impurities. We use a variety of filtration media to achieve this and unlike reverse osmosis or ion-exchange (salt based systems) we retain beneficial acid buffering minerals including magnesium, calcium and potassium. These minerals are always found in natural springs and they are a key requirement for stronger bones and healthy water. For hard water issues we treat your water with our "Hydro Magnetic System". The magnetic field changes the polarity of the minerals in the water giving you **REDUCED SCALE BUILD-UP on the HOME'S PLUMBING and FIXTURES.**

## THE END RESULT:

1. Softer skin and hair
2. No more dry itchy skin and scalp
3. No filters to change or salts to add
4. No under-sink clutter
5. Inhibits the growth of bacteria & fungus
6. Reduces chlorine, chloramines & other contaminants for 7-10 years
7. Reduces unsightly spotting and scaling associated with moderately hard water

## WE ELIMINATE:

1. Slippery, slimy feeling skin and hair
2. Brackish salty tasting water at most faucets and showers
3. Annoying maintenance, monthly service calls, salt or other chemicals, and replacement filters. The patented process includes an automatic backwash which removes accumulated contaminants and then regenerates the filtration media. The result is conditioned, purified, and enhanced water.
4. No brine discharge
5. No environmental impact

**CALL US TODAY AT

### REFINER

High-capacity activated carbon to remove objectional tastes, odors, and environmental pollutants for better tastes.

### HYDROMAGNETIC MODULE

### FILTER

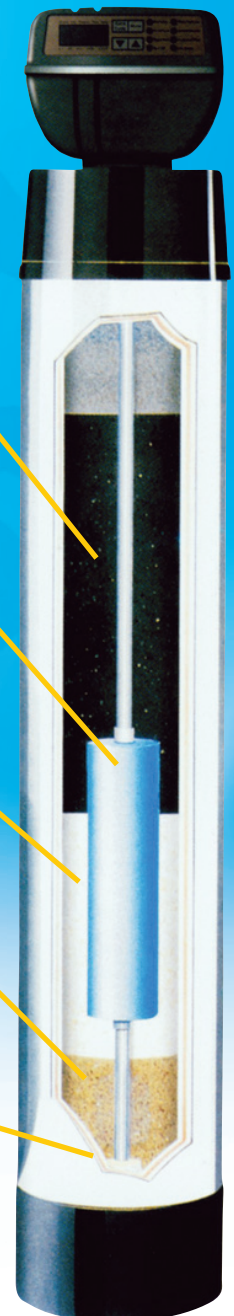

Quartz filter for higher flow rate.

### KDF

Prohibits bacteria growth.

### SOLID CONSTRUCTION

The inner tank is a heavy plastic blow-molded cylinder, surrounded by a fiberglass filament center tank and cased in a polished stainless steel outer tank.
